

COMMUNITY DERMATOLOGY ESSENTIALS

Short course: 6 months via blended learning

Learn how to diagnose, support, and treat patients with skin disease – ensure effective management of their care within primary care and the community and know when to refer to secondary/specialist care.

Delivered by clinical experts from Hull York Medical School, this course is aimed at health professionals working in primary care and the community. Study via blended learning over six-months: **one in-person teaching day 27 October 2026, plus ten two-hour online teaching sessions, and a final in-person teaching day 27 April 2027.**
